FS2301-Smiley Face
FS2319-This Li'l Piggy
FS2314-Black Lab

ColorStix Soft Fan Brush-
65041

Assorted brushes to get desired effect
Fun Writers

Directions

To Make "Stickers":

Step 1 - Print out patterns on regular paper and cut them out. Dampen with water and "stick" onto bisque or apply to wet paint.

-OR-

Print the patterns out on Avery label paper and make your own "stickers".

Step 2 - After applying paint over the label/"sticker" let it dry completely before removing; this will alleviate any glue being left behind on bisque which will cause crawling.

Foam Finger Bank:

Step 1 - Using the soft fan brush, apply Key Lime, Orange Crush and Smiley Face in a loose vertical stripe all over the bank. While still wet, apply stickers. Let dry slightly.

Step 2 - Cover bank in 2 coats of Blue Heaven. Let dry.

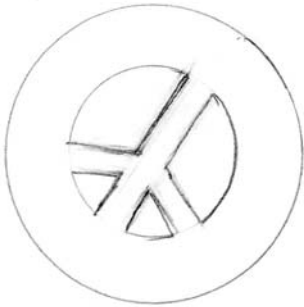

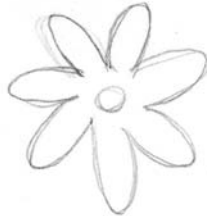

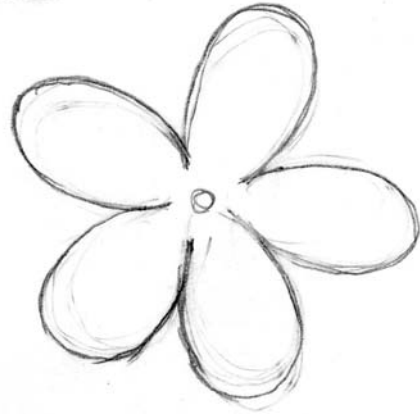

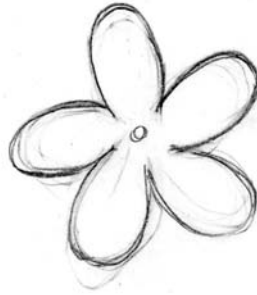

Step 3 - Remove stickers. Using a scraping tool or fine sand paper, gently rub along raised edges of bank to remove the blue and let the other colors show through.

Dip in Gare 9000D and fire to cone 06.
Complete other banks shown using steps 1-3.
