

Stilting Large Platters

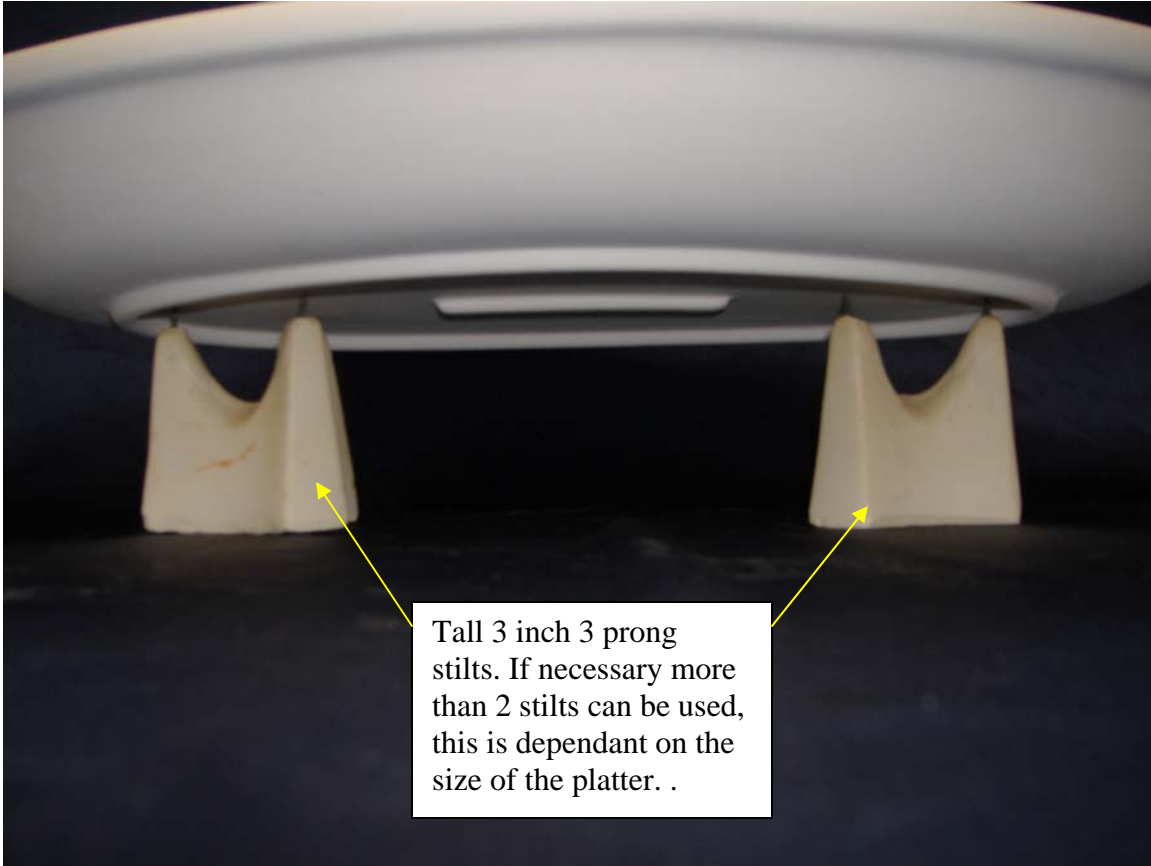

Large platters should be raised up off the kiln shelf using tall stilts or regular stilts raised up with kiln posts. Raising the piece up a couple of inches from the kiln shelf will help reduce thermal shock, which can cause the piece to crack.

Regular 3 prong
stilts raised up with
2 inch kiln posts.

Tall 3 inch 3 prong
stilts. If necessary more
than 2 stilts can be used,
this is dependant on the
size of the platter. .
