Dinner and Salad Plate

STEP 1- Apply 3 coats of Pea Soup to the top and bottom of the salad plate. Let dry.

STEP 2- Apply generous coats of Sweet Pea to both sides of the dinner plate. Let dry.

STEP 3- Go back to the salad plate and apply 2 coats of Polar Bear to the top and bottom of the plate going over the Pea Soup. Let Dry.

STEP 4- Wet and ring out the tee shirt rag and put aside for the next step.

STEP 5- Pour some MASH onto a paper plate or tile. Using the big glaze brush, thin down the MASH a little before you apply it to the plate. Now apply to the whole back side of the plate quickly. Get the damp rag, dab the plate to pull off paint. Don't swipe at all. It's called ragging off so you will be pulling color off slightly and giving a texture look at the same time. Dabbing too much will get it muted and you don't want to do that. Put the dinner plate aside because that's finished other than clear glazing.

STEP 6- Trace your radish pattern onto the salad plate. Put some Oliveoyle and some Pea Soup on a tile. Using the # 6 round brush apply just one coat of Oliveoyle to the leave areas that say O and one coat of Pea Soup to the leave areas that say G.

STEP 7- Apply one coat Red Alert to the entire radish. Using a damp sponge, soften up the color by patting it lightly. Take a little extra off the right side of the radish and add a little on the left side.

STEP 8- Using the # 6 round brush wet, dab and side slide with Happy Trail to shade the leaves and the radish. Make sure this is very light just enough to give it some color. Using a # 6 round brush, wet, dab and side slide your brush with Happy Trails to the outside of the leaves. Do the veins on the leaves with the technique also.

Desert Plate w/peas-

STEP 1- Follow the same instructions as the radish from above.

STEP 2- Trace the peas onto the plate and apply a thin watered down coat of Oliveoyle. Apply a thin coat of Pea Soup just scattered here and there over the Oliveoyle. Apply one coat of Lime Light on the peas and shade them with Pea Soup then shade the outside of the peas with Mash.

STEP 3- Using a little Red Alert, apply on the edges of the peas very lightly.
